🛠️ PROFESSIONAL EXPERIENCE

NEXT

Technical Support Analyst

01/2026 – Present

- Monitor system health and performance using dashboards (Dynatrace, NMON and Power BI Reports)
- Review daily performance reports and escalate concerns.
- Perform system health checks to ensure our websites are performant
- Proactively identify potential issues using available tools eg Dynatrace.
- Monitor and handle specific alerts using agreed processes
- Triage incoming incidents, service requests and tasks within ServiceNow
- Perform initial investigation to gather required information for the investigating team and assign tickets to the correct resolver groups
- Set a suitable priority on incident tickets before escalating to the 2nd and 3rd line support teams
- Creation and maintenance of New KB Articles and spearheading others to do the same
- Creation, Modification and improvement of Dynatrace Synthetics in order for efficient alerting
- Usage of SQL to assist with data checks and investigations
- Handling incident tickets related to failed batch jobs, performing step-by-step diagnostic procedures to restore processing operations within established SLAs
- M

Brennan

Systems Engineer

06/2024 – 12/2025 | Colombo, Sri Lanka

- Diagnosed and resolved hardware, software, and application issues, ensuring SLA compliance.
- Managed support tickets using ServiceNow
- Experienced in Microsoft 365, Exchange, Intune, Entra, Power Platform, and SharePoint administration.
- Have Experience working with Remote Support Tools such as (Bomgar, N-Central & Teamviewer)
- Used PowerShell to streamline repetitive tasks.
- Diagnosed and resolved network issues using Cisco Meraki and UniFi Portal.

PROJECTS

Shift Manager App

For NEXT

- **Solution Architecture:** Designed and deployed an automated AppSheet & Google Workspace shift management solution adopted by 4 cross-functional teams.
- **Process Automation:** Built dynamic quota-tracking logic (16th–15th cycle), custom validation rules, and automated reporting scripts to ensure data accuracy and eliminate duplicate submissions.
- **Operational Impact:** Digitized resource availability tracking, streamlined manager approval workflows, and improved real-time operational visibility across departments

Automated Parking Reimbursement Portal

For NEXT

- Designed and deployed a end-to-end Web Application to automate vehicle parking reimbursement workflows for employees, managers, and internal auditors.
- Built dynamic access controls utilizing spreadsheet-based configuration models to manage user registrations, line-manager mappings, and auditor allowlists without hardcoding.
- Engineered frontend validation and JavaScript Date object parsing to prevent future-dated submissions on mobile devices and fix date-range filtering bugs across pay cycles.
- Integrated automated scheduled email workflows (via Apps Script triggers) to deliver weekly pending claim digests and monthly payroll summary reports on the 16th of each month.
- Designed role-based UI views including a **Claim Submission Portal**, **Manager Workspace** with inline receipt verification, and an **Auditor Dashboard** with multi-criteria search and filtering.
- Technologies Used:
 - **Backend Automation:** Google Apps Script, Triggers, Dynamic Configuration
 - **Frontend Web Development:** HTML5, CSS3, JavaScript (DOM Manipulation, Date Handling)

- Worked with Papercut
- Managed email signatures via the Xink & CodeTwo Platform.
- Escalated support tickets to relevant teams and vendors.
- Contributed to CrowdStrike Outage Remediation Team efforts.
- Resolved QDOS/POS system issues.
- Resolved telephony system problems.
- Documented business and technical processes clearly.

MAS Holdings - Outsourced by Micronet

IT Support Specialist

05/2023 – 11/2023 | Colombo, Sri Lanka

- Provided technical assistance to employees by analyzing and diagnosing their IT-related issues.
- Helped Employees stay productive by resolving their issues via Telephone (3CX), email and ticketing system (Sysaid).
- Escalation of tickets to NOC, SOC and Systems team for second level troubleshooting with findings.
- Responded to help desk tickets and resolved support requests within defined SLAs.
- Experience in Windows Server Administration.
- Administration, maintaining and Troubleshooting Enterprise Active Directory, Office 365, Azure and Intune Services.
- Utilized monitoring tools such as SIPMON to track network health and address outages.
- Proficient in troubleshooting with Fortigate Firewalls.
